CARRER OBJECTIVE

As a creative Frontend Developer, I'm passionate about building responsive, visually appealing, and user-friendly web applications. I enjoy turning complex ideas into simple and elegant digital experiences using technologies like **Next.js, React, Tailwind CSS, and JavaScript**. My goal is to grow as a developer who not only writes clean code but also designs with empathy — creating solutions that connect technology with real people.

TECHNICAL SKILL

Language: JavaScript, HTML, CSS

Libraries / Frameworks: React, Tailwind CSS, MaterialUI, DaisyUI

Technologies: Responsive Design, Basic (Framer Motion)

Tools / Platforms: Git & Github, VS Code, Pixa UI, Figma, Netlify

SOFT SKILL

- Strong communication and collaboration abilities in cross-functional teams.
- Excellent problem-solving and analytical thinking skills.
- Effective time management and organizational efficiency.
- Adaptable, quick learner, and committed to continuous improvement.

PROJECTS

E-Shop (General E-commerce Website)

[Live Site](#) || [Client](#)

A fully responsive online shopping platform where users can buy a wide range of products including groceries, fruits, and beverages. Focused on simplicity and usability, it delivers a seamless shopping experience with modern UI components.

Technologies: Tailwind CSS, HTML, DaisyUI

Key Features:

- Product listings with category filters.
- Shopping cart and checkout interface.
- User-friendly design optimized for mobile and desktop.

RedParts

[Live Site](#) || [Client](#)

A modern e-commerce website designed for purchasing car and motorbike parts. It features a clean and responsive interface, allowing users to easily search, browse, and buy spare parts online.

Technologies: Router, React, TailwindCSS,

Key Features:

- Responsive UI for all devices.
- Product filtering and category-based browsing.
- Smooth animations and clean layout for better user experience.

BookShoo (Online Book Store & Reading Hub)

[Live Site](#) || [Client](#) ||

An online platform for book lovers to explore, read, and discover books across various genres. It aims to create a relaxing and enjoyable reading experience with a clean and minimal design.

Technologies: React, TailwindCSS, DaisyUI.

Key Features:

- Interactive book browsing system
- Dedicated reading section for users.
- Organized layout for better readability.
